

POSHAM LIKITHA HARSHINI DEVI

📞 9391881149 ✉ likkireddy9014@gmail.com [in LinkedIn](#) [GitHub](#) [Portfolio](#)

OBJECTIVE

Dedicated and detail-oriented Computer Science undergraduate with strong interest in software development, web technologies, and machine learning. Passionate about building scalable applications and contributing to impactful real-world solutions while continuously improving technical and problem-solving skills.

EDUCATION

Veltech University, Chennai B.Tech in Computer Science and Engineering	Aug'23 – Jun'27 CGPA: 9.1
Nucleus Jr College, Nandyal Board of Intermediate Education	2023 GPA: 8.9
Good Shepherd E.M. School, Nandyal SSC Board	2021 GPA: 9.3

EXPERIENCE

Full-Stack Intern, GradTwin Pvt. Ltd. Jul'25 – Oct'25

- Developed a full-stack web application using Flask, HTML, CSS, JavaScript, and MySQL.
- Worked on “Lifecycle Impact of Bioresins in Wind Turbines” to analyze environmental sustainability.
- Integrated Machine Learning (FNN) model for lifecycle prediction.
- Implemented AES encryption for secure data handling and backend functionalities.
- Collaborated with team members to improve application performance and usability.

SKILLS

Technical Skills:

- Programming Languages: Java, Python, JavaScript
- Web Development: HTML, CSS, Spring Boot, Flask
- Databases: MySQL, SQLite
- Concepts: REST APIs, OOP, MVC Architecture, Full Stack Development
- Tools: Git, GitHub, VS Code

PROJECTS

Lifecycle Impact of Bioresins in Windturbines [Link](#)

- Developed a system to evaluate environmental impact of bio-resins in wind turbine manufacturing.
- Implemented backend using Flask with SQLite for data storage.
- Integrated Machine Learning (FNN) model for lifecycle prediction.
- Applied AES encryption for secure handling of input data.
- Provided insights into sustainability improvements over conventional materials.

CareerCore – Job Portal Application [Link](#)

- Developed a full-stack job portal web application connecting job seekers and recruiters.
- Implemented secure authentication, job posting, and application tracking features.
- Designed a responsive UI and ensured role-based access control for data security.
- Integrated RESTful APIs for seamless frontend-backend communication.
- Optimized database queries to improve performance and response time.

Weather Forecast Web Application [Link](#)

- Developed a responsive weather forecast web application using the OpenWeather API.
- Implemented real-time weather updates including temperature, humidity, and weather conditions.
- Designed an interactive and user-friendly interface using HTML, CSS, and JavaScript.
- Added city search functionality with error handling for improved user experience.
- Integrated API data dynamically to provide accurate and seamless weather information.

ACHIEVEMENTS & ACTIVITIES

- Solved coding problems on LeetCode and HackerRank.
- Participated in hackathons and technical coding competitions.
- Active participant in extracurricular and collaborative team activities.
